

Figure 1 consists of 12 histograms arranged horizontally, each representing a different value of n from 10 to 120 in increments of 10. The x-axis for all histograms is labeled 'x' and ranges from 0 to 120. The y-axis is labeled 'count' and ranges from 0 to 100. The histograms show the distribution of the number of non-zero elements in the vector x . As n increases, the distribution becomes more concentrated around zero, with the peak count increasing significantly.
